

Fruit Thieves Get Ten Days More for Next

Terrace, June 27—A police court case came up this afternoon which resulted in two local young men having to serve ten days imprisonment each. Last Thursday night Walter Martin saw two young fellows in his strawberry patch and when he went towards them they ran away. As he recognized them he proceeded to lay an information against them, and the court proceedings this afternoon was the result. During past years there have been many complaints of stealing fruit and vegetables from local gardeners. In many cases material damage has been done to fruit trees, and crops have been taken from people who have tended them carefully in hopes of the sale of goods providing them with a portion of their year's living. Too often the growers have been disappointed and have suffered in consequence.

The present case is forerunner of a tightening up of offences of this nature, and in every case where persons are caught interfering with other people's farm and garden produce proceedings will be started immediately, and every effort will be made to bring the practice to an end and give protection to the people who are seeking to provide for themselves.

This being the first case the minimum penalty was imposed, but Magistrate Kenney served notice that in all future cases the maximum penalty will be imposed, and in addition the guilty ones will have to pay for all fruit and vegetables taken and damage done.

A second offence of this nature is an indictable offence and calls for a jail sentence only, after case has been heard before a county court judge.

THE HORTICULTURAL SOCIETY

The Hazelton Horticultural Society met on Tuesday evening and again discussed the matter of suggesting an amalgamation with the Hazelton Community Association and thus do away with at least one organization. The Horticultural Society has some \$374 on hand and this would be available to the Community Association should the amalgamation go through. It was decided to make the suggestion to the larger association and pending a reply the matter of electing officers for the ensuing year was left in abeyance.

ESSAY ON WEEDS CONTEST

In line with its policy to educate the public to become Weed Conscious the provincial department of agriculture is again offering prizes of \$5.00, \$3.00 and \$2.00 to boys and girls under 20 years of age who are attending school for the best essay of 600 words on the subject of Weeds and Their Destructiveness. Full details of the contest will be given at the opening of school in September and the contest will be closed Nov. 3rd. For this district the contest will include all schools between Terrace and Vanderhoof. The boys and girls are urged to make a study of the weeds in the local district and the best methods of destroying them so as to be ready to write their essay in the fall. Information about weeds may be had from the department of agriculture.

The W. A. to the H. H. will hold the regular monthly meeting at the nurses residence on Tuesday afternoon, July 5th, at 3.30 o'clock.

Babine Trip a Success but the Water all Wet

Capt. Mortimer, Indian Agent, got back Monday evening from his annual trip of inspection to the Babine villages—Fort Babine and Old Fort. He reports entire satisfaction with the progress being made by the Indians in the interior and with the manner in which they are weathering the present time of depression. The natives have taken to agriculture in a most encouraging manner, and this year double the number of acres are under cultivation that were cultivated last year. Potatoes, turnips and carrots are the chief vegetables grown and the natives find they are a great help to the winter rations of fish and moose meat. The Captain says he does not think the Babine natives will need as much assistance this coming winter as they have in the last year or two. He took in a lot of clothing, chiefly for the children. This is apparently the greatest difficulty the natives have just now.

Going up the Agent and his party got quite a jolt when crossing he lake in an Indian's boat. They had had a five hour drive over quite a rough road and all were tired and sleepy. As soon as they got on board with all their baggage they promptly went to sleep, trusting to the Indian to get them over the water. As a navigator the Indian was all right, but as a caretaker of a boat he was something of a flop. For himself the boat was probably all right but when he got Capt. Mortimer and a couple more fair sized men aboard, together with baggage, the boat was drawing far more water than it was accustomed to drawing. This showed up a couple of weaknesses in the boat as it leaked quite badly through the seams near the top. About two miles from the far shore the Captain woke up to find himself sitting in a foot or so of water. "Hoot, mon" and then another hoot. The Captain woke up his escort and they started bailing and helping the native navigate. Finally they reached shore but not any dryer than the lake, and neither was their baggage. But a fire was soon built and a cup of tea made. That helped a little, but to dry their clothes was another thing and it was fortunate that Attorney General Pooley did not happen along with his fishing rod and fly. After some hours another boat came along and took the party on to their destination.

After that everything went along nicely until the return trip when the crank shaft on the outboard motor broke and left the party adrift. This was replaced in due course and a safe landing was made at Topley Landing. On the trip the party saw several moose and the prospects for the Indians having a good winter are fairly bright.

MICKY STITCH PASSED AWAY

Many in this district will regret to learn that Micky Stitch of Forestdale passed away a couple of weeks ago at Burns Lake. Micky kept a rooming house at Forestdale. One day he took a stroke outside his home and being unable to get up or crawl, and as no one happened to be around, he lay out in the open for two days and nights and the weather was hot by day and the flies were very bad. As soon as he was found he was removed to the hospital at Burns Lake where he passed away a couple of days later. The deceased was at one time a resident of New Hazelton and he was well known all along the line during construction days.

Fiddler Creek Property to get A 40-Ton Mill

The old Knauss property on Knauss creek, a tributary to Fiddler creek near Dorreen, is to be opened up on large scale at a very early date. This property returns chiefly gold values and is well known locally. Louis Knauss who died some years ago, was the original owner and during his life time a lot of work was done by different concerns, including one company who put Dan Williams in charge of development.

Joe Tredway finally got possession of the property and he worked quite a while on it and has since turned over to P. E. Peterson of Vancouver and his associates. Mr. Peterson arrived in Prince Rupert a few days ago to meet others interested in the property and then proceeded to Dorreen.

The development plans include the erection of a 40 ton mill on the Tredway property within a month and it is anticipated that it will be running and shipping concentrates this year as a good deal of ore has been blocked out in the past. The property is only four and a half miles from the railway at Dorreen and is connected by a wagon road which may need some cleaning out before it can be used.

PROMOTION EXAMINATIONS

Hazelton Public School is the first to Report Midsummer Examination Results

Division 2, Hazelton Superior School—List of promotions in order of merit. From Grade 1 to grade 2—Philip Martin, Philip Cary.

Grade 2 to grade 3—Florence Allen, George Tomlinson, Jimmy Bird.

Grade 3 to grade 4—Rosemary Fraser, Bobby Benson.

Grade 4 to grade 5—Marjory Allen, Richard Vele, David Cary, Robt. Tomlinson.

Grade 6 to grade 7—Bob Allen.

Promoted to grade 8, principal's examinations—Happy Cox, Marie Marth and Eric Martin, equal, Margaret Sargent, Eileen Tomlinson, Charlie Clifford.

Honor Rolls:

Proficiency—Margaret Sargent.

Depotment—Louis Martin.

Regularity and punctuality—Nancy Allen, Florence Allen and Marjorie Allen.

Marjorie Sutherland, teacher

Joe Benson has made such progress that this week he was allowed to go down town and resume his life among the rest of the bachelors.

Good Reports From Dorreen Placer Diggings

Very favorable reports come from Lorne Creek near Dorreen. Eric Larson of New Hazelton and Ed. Utterstrom of Kitwanga and a third party went some twelve miles up Lorne creek and dug into what appeared to them to be an old channel of the creek and the first day they panned \$16.50 worth of gold. Some of it was a good size and the men feel greatly encouraged. The find is a dyke about 500 feet in length and when it was formed or created or accreted, whatever dykes do in the early stages, it shoved the creek over and made it run in an S shape. Whether the find was only a pocket or not the boys were not prepared to say, but they came back to civilization, got some more grub and returned to their diggings. They intend to be back in town again in a week or two when they hope to have a good deal more information. The snow was still quite deep when they were out, but as it had been raining for several days the snow would not last. They might have some difficulty with water for a time.

Bishop Bunois of the Yukon and of Prince Rupert, enroute to Ireland and Rome, rested a few days in Montreal and while there granted an interview to one of the papers. He pointed out that the valleys of the Nechako, Bulkley and Skeena would be the gardens of the future. Five hundred thousand farms can readily be created in these valleys and would provide wholesome and stable employment for many thousands of unemployed. These valleys are as fertile as the Peace River.

The carriage was full, and the commercials were greatly in evidence, telling the usual Aberdeen stories. A big chap with only one leg sat in a corner quietly smiling as each traveller tried to go one better about the meanness of the Aberdonian in general. Then there was a lull, seemingly their store had given out.

When one of the story-tellers casually asked the big chap, still quietly smiling, "Did you lose your leg in the war?"

"Na, na," says the big fellow, "I see, I am an Aberdonian, but my leg was pulled that often after I came South that it fell off."

Mrs. Wm. Grant is making very satisfactory progress at the Hazelton Hospital where she has been a patient for a couple of weeks.

Hazelton Team Badly Beaten Sunday Game

Hazelton was given a good beating on Sunday afternoon by the New Hazelton ball team. The score at the end of the ninth inning was 9 to 1, and it should have been a complete shut-out only for a mistake in judgment on the part of the short stop in the 6th inning. Two men were out, the short stop got an easy one and had lots of time to get the man running to first, but he threw instead to home plate to catch a man running home from third.

From the first inning New Hazelton took the lead and every now and again increased it due to better batting on their part and poor work on the part of some of Hazelton's fielders and basemen. Hazelton has several very weak spots that could be tightened up either by replacing the men or by stricter attention to the game. The battery for the old town did well and Hawkins in centre field grabbed all that came his way and he is getting good at the bat. The New Hazelton team had Delcourt and Louis Parent on for the first time since school closed which helped out a good deal. With these two boys on the line-up and Bert Spooner and Omer Spooner fully recovered from their injuries the New Hazelton team will be in excellent shape, and will be even stronger than last year. Bert Spooner was in the box for New Hazelton and he pitched good ball, but was getting weak towards the end. He has not been doing much since he cut his foot. Omer Spooner, with a lame hip and sore back, was pressed into service after Al Hall had his finger splintered by a fast one from the pitcher. Tom Willan went behind the bat and Omer took right field.

For some reason the heavy hitters for New Hazelton were not able to connect with the ball in the usual manner. When they did hit it was either a foul or a short easy one to the fielders.

MEETING OF CONSERVATIVES

There will be a meeting of the Conservatives of New Hazelton on Tuesday night, July 12th, in the Omineca Herald office, for the purpose of electing officers and for the transaction of general business which might properly come before it. All members, or those wishing to become members are requested to be present.

C. H. Sawie, president

Kellogg's have this patented

Protection

KELLOGG'S Corn Flakes are sealed in a special WAXTITE bag which is placed inside the red-and-green package. It brings the flakes direct from the toasting ovens fresh to your table. It's a patented Kellogg feature.

Some other foods have inner bags of a kind—but Kellogg's is sealed top and bottom... perfect protection. Compare Kellogg's. The flakes are different in appearance, taste and freshness.

Unconditionally guaranteed by W. K. Kellogg: "If you don't consider them the best corn flakes you ever ate, return the package and we will refund your money." Made by Kellogg in London, Ontario.

It is related that Sir Harry Lauder's most alarming moment happened at a Royal Command performance, after which a man who was acquainted with him waited for him in the corridor. "Good-night, George," shouted the comedian to his friend as he turned to go to his room, and to his horror he discovered that the King was also in the corridor.

With his never failing tact the King smiled and remarked, "Good-night Harry, and good luck."

The Ladies Aid of the United church in Hazelton met at the home of Mrs. H. C. Hindle on Monday afternoon.

Mrs. Leon Belmont, who has been in the hospital for the past couple of weeks is in a very serious condition and little hope is held for her recovery.

All Specialized Farming Has Own Problems

When the scientific farmer leaves the realm of the ordinary and enters the field of specialized research he is confronted with an entirely new state of affairs and one to which in most cases ordinary machines or equipment do not apply.

An interesting example of this is supplied by the ingenuity and enterprise of cerealists at the federal experimental station at Swift Current, Sask., where considerable attention has been given to the development of special machinery to aid in carrying on plot work.

One of the problems is the expeditious and economic planting of seed in rod row plots. In this connection improvements to the rod row types of seeders have been made, producing a machine highly efficient and now considered essential equipment for cereal nursery work. Closely allied with this is the construction of a conveyor belt type of seeder designed to sow fertilizers and seeds in rod row and smaller plots. Considerable progress has been made in the design and development of rotary shear harvester for cutting the single rows of grain. Power is derived through eight-inch lawn mower drive wheels. With a few minor adjustments this machine in operation shows much promise as a valuable and practical piece of equipment for cereal nursery work.

Most interesting of all is probably the 24-inch cylinder plot thresher, especially designed and constructed to meet the needs of seed production work. In this machine special care has been taken to prevent seeds from becoming lodged and later mixed with other varieties; a problem which was simplified by constructing the machine nearly all of metal. Practical tests show much of promise for this piece of equipment and further improvements now being made are expected to result in a particularly efficient machine.

THE TENT CATERPILLAR

The large unsightly webs of the eastern tent caterpillars are very much in evidence at the present time in many districts of Ontario. These caterpillars are a common orchard pest and are often abundant on wild cherry, hawthorn and several other species of trees. Unless prompt remedial measures are taken, considerable disfigurement of the trees will inevitably ensue. The following methods of control are recommended:—

The caterpillars have the habit of retiring into their tents at night and at certain hours of the day. Cut off the tents at such hours and destroy the insects either by trampling them under foot or by dipping the tents in a bucket of coal oil. This can be done only when the tents are within easy reach. In higher trees the webs can be burned by means of a torch made of rags soaked in coal oil and mounted on a long pole. As much care as possible should be taken to avoid searching the limbs of trees.

If an adequate spraying outfit is available, spray the foliage of the tree with arsenate at the rate of 1½ lbs. of powder to 40 gallons of water as soon as the presence of caterpillars is noticed. If the caterpillars are more than an inch in length the dosage can be increased to 2½ lbs. of powder to 40 gallons of water. In small amount the above dosage come to 1 or 2 table spoonful of poison to a bucket of water.

Banding the trees after spraying will prevent the trees becoming reinfested by wandering caterpillars and is especially necessary when the latter are very abundant. The most effective method consists in applying "Tree Tangle-foot" about 4 inches wide, completely surrounding the trunk. The band is to be placed at a height of about 5 ft from the ground. A good preparation for banding can be made by boiling resin and castor oil in equal parts, thoroughly mixing the ingredients by stirring them while hot.

Would You Like To be Blind?

Imagine yourself to be blind, and being asked to buy a motor car, or silverware, or clothing, or a pair of shoes, or a clock, or a refrigerator, or a suite of furniture. Imagine yourself to be set down in a main street with stores on both sides of it, and being bidden to purchase the thing or things on your shopping list.

Being blind you would not know what store or stores to enter; and even if you did find yourself in the right class of store, you wouldn't be able to select intelligently what you were bidden buy. You wouldn't know anything about values. It would be cruel to send a blind person to do selective buying.

Advertisements are like radiorvision—They enable you to see in your home what is in the stores, what stores have, what you plan to buy; also, they give descriptions, tell you prices, and answer many of your questions.

Advertisements save you time, and safeguard you against the danger of mischoice.

What is advertised regularly is trustworthy, and is good value.

Be guided by advertisements when you plan to spend money for things to wear, to eat, to give your home easements and comforts, to save your time, to increase output of your own labor, or of your soil or flocks or herds or orchards, or to protect your life, your health, your property or money.

What advertisers do and spend in this and in other newspapers to get your attention and favor should have your warm approval, for what may be expense to them represents economy for you.

Terrace Notes

A heavy rain on Sunday night provided much needed moisture to the local farms and gardens.

J. A. McDonald, local road foreman was in Terrace on Wednesday and proceeded to Usk on Thursday morning. While here he laid out a program of work to be done under direct relief.

Work is being done on the road connecting Copper City and Vanarsdol. This is being extended to the Vanarsdol Lumber Co.'s property. The lumber company is providing the power for grading, free, having lent their tractor for this purpose.

R. E. Moore of Prince Rupert arrived in town on Wednesday.

W. V. McNish of the Workman's Compensation Board was in town for a couple of days checking up on returns.

Osborne Stout is building a summer home on the lake front near A. Attree.

W. F. Barfoot, dean of Emmanuel College, Saskatoon, who is spending a two months vacation in Terrace and district, left on Wednesday for Lakelse Lake, accompanied by Lawrence Greig. They intend spending the next few weeks, taking in the many beauties of the district. Mrs. Greig and Miss Velma Greig joined them later in the week.

Mrs. Alice Munro who has spent the last few months in Vancouver will arrive here on July 1st to spend the summer months in the district. Mrs. Munroe's many friends are looking forward to her visit.

Capt. J. B. Colthurst who has the foundations in for his new cottage at Lakelse Lake has made arrangements with D. C. Mawhinney to undertake the completion of the job. With Dave in charge the Captain is assured that it will soon be ready for occupancy.

While there is not much building activity in Terrace many of the local people have gone ahead with construction at Lakelse Lake. Mrs. Hagen of the Vanarsdol Lumber Co. recently completed a summer residence at the head of the lake, and has now purchased a lot from J. B. Agar near the Lakelse Lodge and intends to build of it right away. J. B. Agar has about completed the construction of his new boat and it will be one of the best on the lake.

The Ladies Guild of Knox United Church held their annual picnic on Thursday. Leaving town at 9.30 they were driven to the lake by Osborne Stout. On arrival at the lake they were taken over to Grouches Beach by Mrs. E. T. Kenney where the day was given over to the festivities. The ladies report having had a splendid time, although details are not forthcoming. This day being one set apart when men are taboo. Later in the day E. T. Kenney arrived at the lake and when the ladies were ready to return home he acted as ferryman for them.

Constable H. L. McKenney returned on Wednesday after a patrol that took him through to the Naas valley and to Allee Arm and Stewart.

T. Tiffen left last week to visit several Bulkley Valley points.

Miss Bates, highschool teacher of Loveland, Colorado, arrived on Monday to spend the summer vacation in the district. Miss Bates is the owner of properties in the Rosswood neighborhood. She is spending a few days in town with Mrs. A. Ross after which both ladies will proceed to their summer homes at the north end of Kalum Lake.

E. Martin of the provincial game board spent a few days in town.

The ball game scheduled for Sunday between Usk and Terrace and to be played at Copper City did not come off owing to a number of the Usk boys being unable to be present.

Miss F. McLaren, R.N., returned Terrace on Wednesday from Rupert.

W. Steinert, Jeff Lambly and L. Astorin, all of Prince Rupert, spent several days in the district this week. They were out over the countryside during their stay and before leaving expressed a desire to locate here before long.

The present season has been ideal for setting out new plots of strawberries. Michaud Bros. report having set out 2100 plants with a loss of only six. They state that 1931 was a different year for planting. During the year they had to replant three times.

Howl, Wolves, Howl

Jim Curran, Editor of the Sault Daily Star, believes with Old Sam Martin that "a man who says he has been bit by a wolf is a liar".

Jim Curran, as all the world knows, is an expert on wolves, so much so, indeed, that he has persuaded Sault Ste. Marie to hold a Wolf Week, July 25-30. That is the kind of a week it's going to be. Jim Curran, the wolf expert, says it will be worth attending; that the Sault is the friendliest

town in Canada, and that respectable strangers will be welcome.

Plug hats will not be practical headgear during Wolf Week at the Sault. This is a warning, and is understandable at a show where the background is totally composed of timber wolves, Hudson Bay Barbecues, Indians and whiskers.

Jim Curran and his fellow-citizens of the friendliest town have cornered the world's best professional long distance swimmers for some real racing, and have per-

suaded the Ojibway Indians to produce a riverside version of "Hiawatha".

A survey of the Wolf Week programme reveals a combination of sentiment and excitement. Governor Roosevelt of New York State has presented the citizens with a British flag taken by the U. S. troops when they burned the Sault in 1814. The flag will be hoisted with appropriate ceremonies. The excitement comes in when the visitors will be invited to amuse themselves running the Sault Rapids in canoes, attending Algoma Wolf Club dinners, and sympathizing with the unlucky winner of a bear, which animal, Jim Curran proposes to raffle in lieu of one of his beloved wolves. The Algoma Self-Denial Club has added three pleasant features to the programme. The members of this club never deny themselves anything, and they advise that there are no peevish cops in the Sault; that their city is only an overnight ride from Toronto on the Canadian Pacific's homeliest train, and that they still serve cheese with the apple pie in the Sault, which Jim Curran says is built beside Lake Superior in the great Algoma forest, near the timber wolves.

Mr. and Mrs. G. L. Treleven of Rupert arrived on Saturday. Mr. Treleven will supply as manager of the local bank while Mr. Beveridge is on vacation.

Braun's Island bids fair to come back as one of the important strawberry areas of the district. Now the new bridge is open for traffic, clearing of land is going on at a good pace, and a number of settlers are planning to get back into strawberries in a big way. Mr. and Mrs. Braun have set out a big plantation this year and have a piece of new ground that is being worked in other crops this year in preparation for strawberry plants next year.

The Catholic Bazaar held in the Canadian Legion hall was well attended and proved a financial success.

The Intervaley Lumber Co. are long in lumber that was cut during the last week.

R. Thompson of Kalum Lake was in town on Wednesday.

From reports received from various parts of the district it would appear that the local moose herds are making good progress. A few years ago moose were unknown in this district. A good

watch was kept on the few that drifted in and it is hoped that in a few years the valley will be stocked to such an extent that an open season will be declared.

Deer are being seen in increasing numbers this year. In spite of the depredations of wolves it seems that they are increasing. Some of them come quite close to the settlements, one having been seen recently within half a mile of Skeena River Bridge and within 40 yards of a house.

Local gardeners are almost counting the days now when they will have new potatoes. Several patches of early varieties are in bloom now.

Nineteen thirty two looks like a big year for wild fruits in the Lakelse Valley. The huckleberries have set large quantities of fruit, and wild raspberries are bending with the weight of green fruit. Last year the local people put up large quantities of wild fruit and already plans are being made to provide for next winter's table.

Motorists report that they frequently have to stop to avoid running over grouse. The birds persist in sitting on the highways, and show little fear of the approaching cars. Grouse have come through the severe winter with little if any loss and seem to have raised big broods this spring.

Here and There

Premier Gordon S. Harrington, of Nova Scotia, has returned from his trip to Europe by the Empress of Britain.

Growth of all crops in western Canada is now vigorous and well advanced for the time of year, according to the latest weekly survey made by the Canadian Pacific Railway's agricultural department, and crop prospects in the West as a whole are encouraging.

Members of the British party touring the Dominion under the auspices of the British Columbian Government, arrived at Montreal aboard the Duchess of Bedford, travelled across Canada by Canadian Pacific rail and lake steamship, stopped over at Banff and will spend between June 15 and July 2 in British Columbia.

Delta Gamma, one of the most important Greek Letter organizations on the continent, is holding its annual convention this year at the Empress Hotel, Victoria, June 27-July 1. Stopping over at Banff, a Canadian Pacific special will carry delegates to the Pacific Coast from Chicago, while Canadian members from Montreal, Toronto and Edmonton will join the main group at Victoria.

If early promise is fulfilled, the Annapolis Valley should this year produce an even larger yield of apples than in 1931 when the total crop was close to a million and three-quarters barrels, is the opinion of leading fruit men of Kentville, N.S. The bloom this year lasted over ten days and attracted visitors by the thousand from Eastern Canada and the United States.

Miss Constance Regan, Middleburg, Va., established a record for women anglers on the Tobique River, New Brunswick, recently, when she took a 27½ lb. Atlantic silver salmon, the largest ever caught with a fly by a woman on that river. The record salmon taken in those waters by a male angler weighed 33¼ lbs.

Canadian Pacific standard time is standard time the world over. Prior to 1883, every town and city had its own local time, based on the sun, but in that year the suggestion of Sir Sandford Fleming, chief engineer of the Canadian Pacific Railway, that the world should be divided into 24 sections, one for each hour of the day, and that time within each of these areas should be standard, was adopted all over Canada and the United States. In 1884 the plan was also adopted in Europe after a conference held at Washington.

Gilbert Miller, architect, of Youngstown, O., has a grouch against windows and doors in office buildings and summer homes. He found both too narrow to admit a moose head with an antler spread of five feet five inches taken from a monster he shot near St. Jovite last season. "It looks," he wrote to A. O. Seymour, general tourist agent, Canadian Pacific Railway, "as though both the head and myself will end up in the garage." But that is the kind of trophy to be got in the forests of Quebec. Big heads and lots of them. (349)

A friend of mine keeps a dairy, or perhaps I should say the dairy keeps him, but, in any case, says C.J.A., in the Dairy News, he got nicely bitten the other day.

A man, a Scotsman, I believe, walked into a store and asked for a dozen "black hens eggs."

"I don't know the difference between a black hens egg and a white hens egg, said my friend, "but if you can tell, you had better come round and pick them out yourself," my friend said.

The man did so and picked a dozen of the biggest eggs there were.

"Ah," said my friend "I know an egg from a black hen now."

Toney Grecco has been allowed out of the hospital although his leg is still in a cast. Some weeks ago Toney pitted his strength against that of his pet bull and Toney got the worst of it, although there is still some doubt in Toney's mind.

FOR SALE—Fordson Tractor in excellent condition....This tractor has had very little use....It is equipped with standard flanged wheels and also has a set of practically new solid rubber tired disc wheels. Make us an offer.—S. E. Parker, Ltd., of Prince Rupert, B. C.

For Rent—Three roomed cottage, opposite the Anglican Church, Hazelton; furnished or unfurnished—Apply to Geo. McGrath, Hazelton.

At a meeting of the W. A. to the Hazelton Community Association it was decided to not put on any form of entertainment for the present.

J. Newell of Lake Kathryn lost his home through fire about midnight of Monday last.

Some good ore is now in evidence in the No. 2 vein on the Jessie Gold mine property near Smithers. Work on this vein is being continued.

High school teachers at Smithers are to get a ten per cent cut in their salaries while the public school teacher will be cut five per cent.

Miss Vere Doodson of Smithers was among the successful students at the Victoria Normal School this year and she is now qualified to teach. She has arrived at her home in Smithers.

Miss Ethel Tomlinson has returned to her home after completing another year in the Prince Rupert high school.

Mrs. A. M. Ruddy of Burns Lake was a guest on Sunday of Mrs. Peter Smith. She motored down from Smithers with Mrs. G. H. Wall, who she is visiting for a month. Other members of the party were Mrs. Frank Taylor Miss Avis Wall and D. Wall.

Reports from McConnell Creek are to the effect that there is no room out there for poor men. Thus far only a limited number of colors and small nuggets have been secured, and for the present season sluicing is just getting nicely under way. Some of the reports of course gold finds are without foundation in fact. The field has to be proven a producer.

Schools will close on Thursday of this week for the summer months.

Mrs. F. A. Goddard returned to her home here after being a patient in the Hazelton Hospital for a week or two.

The power grader got down from Smithers last Thursday and has since gone back, but the roads are in better shape as a result of the visit.

Olof Hanson and Austin Goodenough paid a visit to the Hanson camp a Bell Lake last week.

Mary Raabe and Margaret Windt of Smithers have both passed their examinations at Normal school, Vancouver and they are now entitled to teach.

The club members were cracking jokes. "Can anyone tell me the difference between a Scotsman and a coconut?" asked one.

After a while, as no reply was forthcoming, the speaker decided to supply the answer. "Well," he said, "you can drink out of a coconut, but—

"Excuse me," put in one of the others, "but I happen to be a Scotsman. Would you like a drink?"

"Delighted," replied the joker.

"Then buy yourself a coconut."

The Omineca Herald is \$2.00 per year

The greatest problem in connection with the unemployment program seems to be to get work for the men to do. The government decided that work is to be given in return for relief orders, but the thing seems to be to provide the work—that is work that is worth while. Having no program of road work is proving a big mistake.

DISEASE WILT OF CHINA ASTORS

The China aster is one of the very choicest of late summer and early fall annual flowers. Much of its popularity with gardeners, however, has been lost owing to the difficulty experienced in successfully growing it. The difficulty is largely due to a disease known as aster wilt which is caused by a soil fungus attacking the plants through the root system and eventually causing them to wilt and die.

In spite of this disease asters may be grown satisfactorily when proper attention is paid to seed, soil and rotation. The fungus may be carried on the seed therefore only seed from healthy plants should be used or else seed disinfection practised by soaking in mercuric chloride 1.1000 strength for one-half hour. The soil where the asters are to be grown is most important. Once soil has grown asters which developed wilt it becomes contaminated and the disease germ persists in that soil for a long time. Such soil is spoken of as aster-sick and should be avoided for the cultivation of asters. In cases of beds of limited size aster-sick soil may be treated with formalin 1.50 strength and losses to the plants reduced. This treatment requires the soil being spaded to a depth of ten inches and thorough wetting with the solution. It should then be covered with sacks which have been soaked in the solution and left for a day. After treatment the soil must be spaded over three or four times and not planted for a week. Whenever possible practice a long rotation and avoid using the soil year after year for asters.

Certain of the asters are resistant to wilt disease and the seed of such plants also possess this quality. By selecting seed from plants showing this resistance and by developing new varieties from such selections considerable satisfaction in the culture of aster may be obtained.

Finally, if the disease appears, soil contamination and further spread may be reduced by prompt attention to sanitary measures, i.e., the pulling and burning of diseased plants as they appear.

IN THE COUNTY COURT OF PRINCE RUPERT

IN THE MATTER OF THE ESTATE OF LIZZIE CAMPBELL

and

IN THE MATTER OF THE "ADMINISTRATION ACT"

Take Notice that by an order of His Honor F. McB. Young, Judge of the County Court of Prince Rupert, made the Seventeenth day of June, A. D., 1932, I was appointed Administrator of the estate of the said Lizzie Campbell, deceased, and that all parties having claims against the said estate are hereby required to forward same to me properly verified on or before the 2nd day of August, 1932, and all parties indebted to the said Estate are required to pay the amounts of their indebtedness to me forthwith.

Dated at Smithers, B. C.,

this 21st day of June, 1932,

H. B. Campbell

Official Administrator
